“An environment which supports the acquisition of alternative language forms does not seem to come naturally” Von Tetzchner & Grove

AAC Social Group for non-verbal children

This is an activity based unstructured social group. The speech pathologist will facilitate further development of the following skills using your child's AAC device:

1. Greeting others and introducing self
2. Answering basic social questions
3. Sharing likes and dislikes
4. Retelling an event
5. Making comments in play/activities

Enquiries and registrations are now open for our holiday group program running in **January 2017 School Holidays (January 8th -12th Jan 11am-12 noon)**
Cost \$437.50 for 5 hours or \$87.50 an hour.
