

About us:

We are a team of 4 Speech Pathologists with 30+ years combined experience. Each of our therapists hold Certified Practising Membership with Speech Pathology Australia and have completed NDIS worker screening checks.

We are an **NDIS registered provider** (including Early Intervention and Therapeutic Supports) and accept Agency, Plan and Self-Managed NDIS clients, as well as private paying clients.

We are a clinic with a majority **disability caseload** and have a strong focus on functional communication and **neurodiverse affirming practice**. All of our therapists have experience with a range of complex diagnoses and complex communication needs. We are all experienced in **using and prescribing AAC** (communication systems for nonspeaking and minimally speaking children).

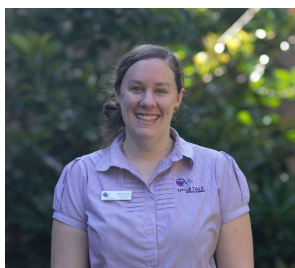

We offer a range of Speech Pathology services for children of all ages from toddlers to teens (1-18yrs). We offer regular appointments in our Mayfield clinic as well as outreach services within our local community. We recognise the importance of working together with a client's educational setting and have developed very close relationships with many local preschools and schools.
